Title : Café with online ordering (UI)

Café with Online Ordering: "Brew & Bean" café wants a site where users can build their coffee order. Use form elements (checkboxes for add-ons, number for quantity) and dynamically update the order summary and total price using JavaScript (conceptually, focus on the form UI).

Basic Structure of HTML

```
<html>
<head>
<title>Brew & Bean Café</title>
</head>
<body>
```

- **<html>**

•Root element of the webpage.

- **<head>**

•Contains **information about the webpage** (not visible on screen).
•

- **<title>**

•Sets the **tab name** in the browser → *Brew & Bean Café*

- **<body>**

•Contains all **visible content** (what user sees).

🔘 Radio Button Example

<input type="radio" name="coffee" value="espresso">

🔹 **<input type="radio“>**

•Allows user to select **only ONE option**

🔹 **name="coffee"**

•Groups all radio buttons together

•Only one can be selected from same name

🔹 **value="espresso"**

•Value sent when form is submitted

➕ Add-ons (Checkboxes)

<input type="checkbox" name="addon" value="milk">

🔹 **<input type="checkbox">**

•Allows selecting **multiple options**

🔹 **Difference:**

- ✅ Radio → only one
- ✅ Checkbox → many options

Main Concept of This Code :

To create a simple online coffee ordering form for a café (Brew & Bean Café)

- Choose a coffee (Espresso, Latte, Cappuccino)
- Select extra add-ons (Milk, Caramel, Cream)
- Enter quantity
- Fill personal details (Name, Phone)
- Submit the order

Future Improvements for this project :

1. Add CSS (Design & Styling)

Make the page look modern and attractive

- Add colors, fonts, spacing
- Style buttons and inputs
- Create a café theme ☕

Example improvements:

- Background color or image
- Stylish buttons
- Better layout (centered form)

Code:

```
<html>
<head>
 <title>Brew & Bean Café</title>
</head>
<body bgcolor="brown">
 <h1>Brew & Bean Café ☕ </h1>
  <form>
<h3>Select Your Coffee</h3>
    <input type="radio" name="coffee" value="espresso">
  <img
src="https://upload.wikimedia.org/wikipedia/commons/4/45/A_small_cup_of_coffee.JPG"
width="80">
      Espresso (Rs30)<br><br>
```

```
<input type="radio" name="coffee" value="latte">

<img src="https://www.seriouseats.com/thmb/mhyOZEerd4xc6CwJVoRJ-rgg44o=/1500x0/filters:no_upscale():max_bytes(150000):strip_icc()/__opt__aboutcom__coeus__resources__content_migration__serious_eats__drinks.seriouseats.com__images__2013__11__20131107-latte-tulip-464c68d355e34ac1870c1230dd93e7ee.jpg" width="80">

Latte (Rs40)<br><br>

  <input type="radio" name="coffee" value="cappuccino">

<img src="https://cdn.uengage.io/uploads/18085/image-993178-1717589323.jpeg" width="80">

Cappuccino (Rs50)<br><br>

<h3>Add-ons</h3>
```

```
<input type="checkbox" value="milk"> Milk (+Rs100)<br>
<input type="checkbox" value="caramel"> Caramel (+Rs150)<br>
    <input type="checkbox" value="cream"> Whipped Cream (+Rs200)<br>
<h3>Quantity</h3>
  <input type="number" name="quantity" min="1" value="1">
<h3>Your Details</h3>
    Name: <input type="text" name="name"><br><br>
     Phone: <input type="text" name="phone"><br><br>
     <br>
    <input type="submit" value="Place Order">
</form>
</body>
</html>
```

Brew & Bean Café

Select Your Coffee

Espresso (Rs30)

Latte (Rs40)

Cappuccino (Rs50)

Add-ons

- Milk (+Rs100)
- Caramel (+Rs150)
- Whipped Cream (+Rs200)

Quantity

Phone:

Place Order

Conclusion

This HTML code successfully creates a **simple and user-friendly café ordering form** using basic form elements.

It demonstrates how to:

•Collect user input using different input types (radio, checkbox, text, number)

•Organize data in a structured way using a <form>

•Build a basic interface for an online ordering system
